

## Practice Graphing Linear Equations

Date \_\_\_\_\_

**For each problem below:****a) Create a T-chart of x and y values.****b) Sketch the graph of each line.****c) Circle the x- and y- intercepts on your graph.**

1)  $y = -x - 4$

2)  $y = \frac{1}{3}x - 3$

3)  $5x - 2y = 0$

4)  $3x + y = 4$

5)  $x$ -intercept = 3,  $y$ -intercept = 1

6)  $x$ -intercept = 2,  $y$ -intercept = 1
